STUDY HALL

The official study hall policy, as explained in the Curriculum Guide, states that students are limited to four study hall periods per week. This means that, during a semester, a student can have one period that is always study hall, or two periods that alternate study hall with a course. It is against this policy for a student to have one year-long every-other-day study hall along with one semester-long every-day study hall, as this leads to too many study hall periods per week during one semester.

INDEPENDENT STUDY

If you are considering an Independent Study course next year, you should speak to the potential advisor as soon as possible. Sign up will take place in April. Go ahead and fill your schedule now, and we can drop a course later if need be.
